Water Watch

After the mass of rain that came flooding through over than past month has been amazing. We went from 39% To nearly 80% in about two weeks.

The water percentage is now at 80.40% and we can finally start having some great racing and family boating days out on the water.

Reminder of the MRSBC Membership Agreement

A Reminder to all members that you must not cause unnecessary disruption or delay in pit area while launching or retrieving your boat, (Get ready in top car park areas).

Cars are not to be parked in pit area only in top car park. And NO Vehicles are to be taken passed the marked line when putting your boat trailers on or off the trolleys, (NO Vehicle to be on steel covers).

Also a reminder that it is essential you attend ONE (1) general meeting a year to avoid being levied. Also that you attend THREE (3) Working Bee's are also essential to avoid being levied. The next general meeting is Tuesday the 16th of November from 7pm to 10pm, the following meeting after that is our annual Break up BBQ and combined General, Race and Committee Meeting on Tuesday the 14th of December.

The Next Working Bee day is the 17th of October commencing at 9am and finishing at 1pm and the following Working Bee is Sunday the 21st of November.

A reminder that no boat is allowed to enter or use the water located at MRSBC if they are not financial members.

Also race boats wanting to practice must

be in contact with Rob Psaila before they enter onto the water, for safety issues. There are also set times allocated for race boats to practice on the water so please be aware of these. If you are not aware please be in contact with Rob Psaila.

All members are reminded to take note of your signed MRSBC Membership Agreement.

For concerns please contact Rob Psaila.

Lake Mulwala Power UIM Grand Prix Hydroplane World Championships

Helpers are needed in the running of the UIM Grand Prix Hydroplane World Championships GP Pitts which MRSBC have put their hand up to run at Yarrowonga on the 28th, 29th of November this year. MRSBC has been asked to help with the running of this event, and it would greatly appreciated if you could offer your time to help out. If you can help please call Mark Shepherdley on 0400 029 062.

Rear Commodores Report

This season of 2010 – 2011, our rear commodore is Chris Dynon.

Well it's the start of a new season and with the water at its highest in a long time let's get boating. We had the first working bee and WOW what a turn out we had around 30 people helped out, we got a lot of things done that has needed to be done around the club but it can't stop there as we still have a lot more to do, as the club will be used a lot more this season and also the running of the well mist Melton Gold Cup we all have to do our bit.

I hope that we have as big a turn out as the first working bee at the next one on October 17th 2010. And I hope you all signed the sign in book and got your coupons from myself or Kaz Wojcicki (Commodore) if not you need to make sure that you sign in and get your coupons, next working bee/scrutineering day so it will make it a lot easier when it comes time for next seasons renewals.

After the working bee had finished I looked at the water and went home and got my boat and came back to the club to have a ski, driving in to the club and down to the ramps it was really good to see just how much work was done and how much better the gardens looked so I thank all that came and helped and hope to see you all again over the coming months.

If anyone can offer their trade skills or trade supplies to help the club can you let me know as it would be great for the club and the club would like to use and help a member out than calling someone not involved with the club, so if you can give me a call as I will put together a list that the club can use. Hope to see you all on the water and safe boating.

See you on the water.
Chris Dynon.
Rear Commodore.

Tool Box Tips

Courtesy of Australian Waterski Magazine

Every diehard skier should have a toolbox on standby with some essentials that could save the day. We delve into our editor's to see what he's got on hand.

"There have been many times over the years the trusty toolbox has come to the rescue, keeping me out on the lake, or solving a crisis mid-competition. If you haven't got something like this with you in the boat at all times, you should. Here's what's in my kit."

WITH BEN WILSON

Goggles

Believe it or not, but I always keep a pair of work safety goggles in my toolbox these days. It wasn't until the National Waterski Titles in South Australia in 2006 that I realised just how handy they can be. On the morning of my slalom final, rain clouds rolled in and the heavens opened up. We all know how hard it can be to ski in the rain, so I ducked out and purchased a pair of goggles to help keep the rain out of my eyes. The goggles paid off, helping me to secure second place in the final.

Callipers

Most ski "tech heads" will carry around a pair of callipers so that we can make the most minute of fin adjustments at any time. For those of you who are unaware, even the slightest of movement to your fin, by a 100th of a mill or so, can make the ski ride completely different. Remember to always measure your fin first before you move it, so you are able to move it back to the exact spot in case you need to.

Duct Tape (AKA 100mph tape)

You have most likely seen this in the pit lane during the V8 Supercar events. This tape can be used to stick just about anything together, and it comes in very handy out on the water. I have used it for a number of things such as an emergency short term fix on a leaking water hose. It also comes in very useful if you need to re-loop a ski rope or handle, as you can use it to tape up the loose strands together so that you can feed it back inside the

If you would like an add or an article in the monthly Newsletter please email or mail to me by the 10th of every month on:

rope easier. It even comes in handy if you have dinged the end of your wakeboard and it's starting to delaminate; you can use the tape to seal the split so that no water leaks in until you get it properly repaired.

Zip Ties

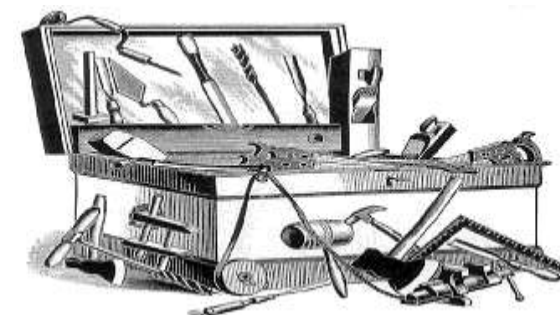

I honestly think I could build a house out of these things. Only kidding, but they do come in very handy. My most common use for them is a quick fix on a ski or wakeboard binding. If you see that it's starting to tear a little, but you still want to ride for the day, you can slip a zip tie or two around it and it should hold up ok.

Screwdrivers

I know, it sounds simple, doesn't it. But do you know how many times I'm out on the water or at the starting dock at a tournament and someone is screaming for a Phillips- head screwdriver! They always come in handy, and when you need it the most you can never find one. Never leave home without your screwdrivers!

Spare Fin

I have learnt the hard way on why you should keep a spare fin in your tool box. I was training at my home site of Melton, west of Melbourne, on a fresh Sunday morning. I had the perfect pre-turn and was heading through the entry gates and just about to begin my edge change into one ball when my sky slid out from underneath me and threw me crashing to the water. It was the strangest crash I had ever had. Feeling my ski to see what went wrong I noticed that my fin had been ripped completely out. Further investigation later helped us work out that it was ripped out by a timing magnet at the entry gates. So from this day on I have always carried a spare fin with me.

Working Bee
Sunday 17th October
9am to 1pm
Please bring gardening tools & be prepared to do some painting of the armco etc
Any queries contact Kaz 0419 514 310

Scrutineering
Sunday 17th October
9am to 1.30pm
Any queries contact Rob 0417 590 931
